SUMMARY

Computer Science Engineering student and Data Science Intern seeking a role where new learning is converted directly into delivered work. My strength is depth over breadth: I learn what a project actually needs and take it end to end. At Amdox Technologies I completed a Data Science and Analytics training programme, and at E2R Online I built and benchmarked LSTM, Prophet, ARIMA, SARIMA and XGBoost models for Battery Management System forecasting on Hardware-in-the-Loop data, improving RMSE and R2 through hybrid modelling and feature engineering. I have contributed to an open-source MLOps automation project through GirlScript Summer of Code, ranking 18th Best Mentor nationally, and I am certified across Google Cloud Gen AI Academy 2.0 and IBM SkillsBuild cloud and AI tracks. Proficient in Python, Pandas, NumPy, Scikit-learn, SQL, Git and Google Cloud Platform.

EXPERIENCE

Data Science and Analytics Trainee

Amdox Technologies

June 2026 - August 2026 | Bengaluru, Karnataka

- Completed a structured Data Science and Analytics training programme covering the end-to-end analytics workflow, from data ingestion and cleaning through modelling and reporting
- Applied Python, Pandas, NumPy and Scikit-learn to preprocess datasets, engineer features and build and evaluate predictive models
- Worked with SQL and exploratory data analysis to profile datasets and translate findings into clear visual summaries
- Recognised by the programme for dedication, professionalism and growth in both technical and collaborative skills

Certificate ID adx/LzlhPr4clo

Data Science Intern

E2R Online Services Pvt. Ltd

June 2025 - July 2025 | Pune, Maharashtra

- Developed time series forecasting solutions for Battery Management Systems (BMS) using real-world datasets generated through Hardware-in-the-Loop (HIL) simulations
- Implemented and benchmarked LSTM, Prophet, ARIMA, SARIMA and XGBoost models for battery state and thermal prediction, selecting the best performer by RMSE and R2 score
- Performed data preprocessing and feature engineering to handle sensor noise, missing values and data drift, improving model stability on production-like data
- Designed hybrid machine learning models that increased forecast accuracy over single-model baselines
- Built end-to-end Python machine learning pipelines covering data ingestion, model training, testing and optimisation

Open Source Contributor and Mentor

GirlScript Summer of Code (GSSoC), Open Source Program

July 2025 - September 2025

- Contributed to the open-source project "MLOps Automation for ML Algorithm Failures" (Python)
- Conducted code reviews and debugging sessions to help contributors meet code quality standards
- Ranked 18th Best Mentor in the official GSSoC national rankings

Data Science Intern (Remote)

Prodigy Infotech

February 2025

- Delivered data analysis and machine learning projects using Python and industry-standard data science tools
- Conducted Exploratory Data Analysis (EDA) to identify patterns, trends and actionable insights across real-world datasets
- Applied Pandas, NumPy and Scikit-learn for data preprocessing, modelling and

SKILLS

Programming Languages

Python (primary) · SQL · C (intermediate) · Java (intermediate) · Go (basic)

Data Science and Machine Learning

Supervised and Unsupervised Learning · Predictive Modelling · Regression · Classification · Model Evaluation (RMSE, MAE, R2) · Feature Engineering · Data Preprocessing · Hyperparameter Tuning

Time Series Forecasting

LSTM · Prophet · ARIMA · SARIMA · XGBoost · Hybrid Models

Deep Learning and Computer Vision

CNN · HOG · OpenCV · Face Recognition · TensorFlow / Keras fundamentals

Data Analysis and Visualisation

Pandas · NumPy · Scikit-learn · Matplotlib · Exploratory Data Analysis · Statistical Analysis · Data Cleaning

Cloud (Foundational Exposure)

Google Cloud Platform · IBM Cloud · IBM Watsonx.ai · IBM Data Refinery

Generative AI and NLP

Generative AI Fundamentals · Natural Language API · Speech-to-Text · Document AI · Chatbot Development

Tools and Platforms

Git · GitHub · Jupyter Notebook · VS Code · Google Colab · Firebase · REST APIs

CERTIFICATIONS

Training Certificate - Data Science and Analytics

Amdox Technologies, Bengaluru · Issued Aug 2026 · ID adx/LzlhPr4clo

Google Cloud Gen AI Academy 2.0

Hack2Skill, 2026 · Program Completion · ID 2025H2S10GENAI-C300375

- Data Engineering Track - BigQuery, Dataflow, Pub/Sub, data pipelines
- AI/ML Engineering Track - Dataprep, Dataproc, Apache Spark, NLP APIs, Document AI
- Serverless Architecture Track - Cloud Run, Cloud Functions, REST APIs, Firebase
- Cloud Security Track - Sensitive Data Protection, DLP API, Dataplex governance
- Cloud Networking Track - VPC networks, Compute Engine, IAM

Python for Data Science (Elite)

NPTEL · ID NPTEL25CS69200065

Journey to Cloud: Envisioning Your Solution

IBM SkillsBuild, Feb 2026 · Credly verified

Getting Started with Artificial Intelligence

IBM SkillsBuild · Credly verified

IoT Network Specialist Certificate Programme

July 2025 · ID RFSA000257706

validation, and produced visual analytical reports for stakeholders

PROJECTS

Super Store Data Analysis - Cloud Data Analytics

IBM Watsonx.ai Studio | IBM Cloud | IBM Data Refinery

github.com/piscongentine/SUPER-STORE-DATA-ANALYSIS · IBM SkillsBuild / Edunet Foundation

- Built a hands-on retail analytics pipeline on IBM Cloud: created a Data Analytics project in Watsonx.ai Studio and imported the Sample Super Store transactional dataset as a verified data asset
- Refined the data in IBM Data Refinery, using automatic column type conversion across shipping mode, customer segment, geography, product category and sales/profit fields
- Analysed the refined data with a pie chart for profit distribution by region, a bar chart for transaction volume per region, and a Pareto chart to isolate the vital few regions driving most business value
- Concluded that a small number of regions generate most of the profit, and documented all nine steps with screenshots in the repository as hands-on proof

Face Recognition Automated Attendance System

Python | OpenCV | Face Recognition

- Built an automated attendance system that identifies individuals in real time from live camera input and logs attendance to a database
- Developed a GUI application with a live camera feed, status logs and attendance tracking for non-technical end users
- Automated record storage and reporting, removing manual attendance entry

Hybrid CNN-HOG Image Recognition Model

Deep Learning | Computer Vision

- Designed a hybrid model combining Convolutional Neural Networks with Histogram of Oriented Gradients (HOG) feature extraction for image recognition
- Optimised the architecture to reduce GPU load and inference time while maintaining recognition accuracy
- Evaluated trade-offs between classical computer vision features and deep learning representations

iThyro - Intelligent Thyroid Diagnostic Chatbot

AI | NLP | Healthcare

Early stage - ongoing research

- Exploring a domain-specific chatbot that offers thyroid diagnostic insight and medical examination guidance from user inputs
- Scoping a self-reliant domain knowledge base for personalised healthcare assistance and test report interpretation

DriftWatch - MLOps Drift Monitoring

Python | Feast | Evidently

github.com/piscongentine/driftwatch

- Wired a Feast feature store, a failure-prediction model and Evidently's drift detection into one working MLOps loop, trained on synthetic sensor data
- Pushed live batches continuously and compared each one against the training reference, catching data drift before it silently degrades model predictions
- Validated the pipeline with 150 automated tests across five Python versions, running entirely on a laptop with no cloud account or paid key
- Authored a 20-issue "Issue Lab" of reproduced upstream open-source bugs from Feast and Evidently, for contributor-focused code review practice

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering

Haridwar University · Uttarakhand · Expected 2027 · CGPA 8.12 / 10 (through 6th semester)

Senior Secondary Examination (Class XII), CBSE Board · 2023

Secondary School Examination (Class X), CBSE Board · 2020

LANGUAGES

English · Professional proficiency

Hindi · Native

STRENGTHS

Analytical thinking · Problem solving · Research and data-driven decision making · Technical communication · Adaptability · Self-motivation
